

Program Partners

Here at Shriver Job Corps Center we have joined forces with industry leaders to bring their industry leading certification programs to you.

Microsoft IT Academy will allow you access to Microsoft Authorized material as well as a Microsoft Certified Trainer to help you obtain your MCSA.

Sun's Academic Initiative (SAI) is a program SUN has created completely on-line. This program will help you obtain your Sun Certified System Administrator for the Solaris 10 at your own pace.

Novell Academic Training Partner (NATP) allows us to offer you a connection to a leader in the networking world to bring you SUSE Linux. This program will help you obtain your Linux+ certification.

Program Description/Requirements

Description:

The Advanced Computer Technologies Trade here at Shriver is designed in such a way to allow each student the opportunity to achieve a high level of technology based certifications. The IT industry is ever changing and employers are continually looking for the best and the brightest. Having in-demand certifications from industry leaders such as Microsoft, Sun and Novell will help you meet employers needs.

Prerequisite:

- A+ Certified Required, A+ and Network+ Preferred
- 560 or higher TABE scores
- High School Diploma or GED
- Motor Vehicle License (or obtain one at trade completion)
- 18 years of age
- Center Director Recommendation
- Letter of Interest
- Additional Information as requested

Sun Academic Initiative (SAI)

The Sun Academic Initiative (SAI) prepares an individual for the Solaris Certification with the knowledge and skills to perform the job function of a Solaris/UNIX System Administrator. Solaris Administration focuses on system administration and management of UNIX systems through addressing user needs, tuning, environment enhancements and resolving problems. Through UNIX, individuals learn to configure and install the Solaris operating system, perform user administration, backup and restore data, administer security, modify kernel functions, and manage resources. Knowledge and skills developed through the Solaris/UNIX System Administration Program will provide a solid foundation in system administration that can be used in combination with other System administration programs.

This program is 6-8 months in duration and has a requirement of completing the Microsoft IT Academy course first.

Novell Academic Training Partner (NATP)

Getting Started with Linux: Novell's Guide to CompTIA's Linux+ (Course 3060) introduces individuals to the knowledge and skills needed to manage all Linux distributions. Specifically, this course covers the objectives outlined by CompTIA® for its Linux+ exam and certification, an international industry credentials program that offers proof of knowledge in many areas

Not only does this course prepare students for the CompTIA Linux+ exam; it offers an excellent way to begin preparing for the Novell Certified Linux Professional (Novell CLP) practicum exam. In fact, after completing this course, students will have acquired one-third the knowledge needed to become a full Novell CLP, the ideal certification for people interested in become Linux administrators.

Microsoft IT Academy

Microsoft Certified Professionals (MCPs) stand apart from other IT personnel. They've demonstrated undeniable expertise with Microsoft products and platforms to colleagues, employers, and—most importantly—to themselves. Our membership in the Microsoft IT Academy Program provides valuable benefits for students.

- World-class Microsoft curriculum to educate students about vital technologies.
 - Wide-ranging, online resources for anytime, anywhere learning and collaboration.
 - Enabling students with real-world abilities needed for career success.
 - Supporting employers and communities with a workforce of skilled Microsoft professionals.
 - Creating a foundation for students that supports lifetime career development.
- When you first enter the trade, Microsoft's MCSA Certification is the track you will start first and is a 40 week program.
